

Congratulations and welcome to the exciting world of hot tubbing. Along with the delivery of your Arctic Spa you have received this Essential Salt Starter Kit. This kit contains products you will need to help maintain your water balance. Based on your source water quality chemicals not included in this kit may be required.

It is important to note that the below recommendations are strictly a guideline. Individual maintenance will vary based on factors such as water source, usage, body composition, bather load etc.

Starter Kit Contents			Recommended Levels	
Starter Kit Contents	Its Job	Cap Quantity		
<i>Sea Salt Blend</i>	Sanitizer		<i>Chlorine</i>	3-5 ppm
<i>Boost</i>	Shock	1 cap = 25 grams	<i>pH</i>	7.2-7.6
<i>Refresh</i>	Oxidizer	1 cap = 25 grams	<i>Alkalinity</i>	80-120 ppm
<i>Salt Water Balance</i>	Lowers pH	1 cap = 30 grams	<i>Calcium</i>	125-200 ppm
<i>Adjust Up</i>	Raises pH	1 cap = 30 grams	<i>Salt</i>	2000-2500 ppm
<i>Perfect Balance</i>	Raises Alkalinity	1 cap = 25 grams		
<i>Ultra Spa</i>	Conditioner	1 cap = 30 grams		
<i>Best Defence</i>	Protects Equipment	see bottle		
<i>Rainbow Chlorine/PH Test Kit</i>	Tests Balance			
<i>Aquacheck Test Strips Salt</i>	Measures salt			
<i>Zorbie</i>	Removes oils			

Start-up

Once the spa has been filled with water, powered up and filtration set, place the insulated cover on the spa. After the tub has reached 85°F or higher, you can begin adding the chemicals listed below. While waiting to heat up refer to your owners manual (pg 136) on how to set up home connect and your myarcticspa.com account if you have not done so already.

- 1.) Add the initial dose of **BEST DEFENCE** (2 oz/1000L). Turn pump(s) on wait 1 hour
- 2.) Test pH & alkalinity, adjust if needed
- 3.) With pump (s) operating add 20g/1000L **BOOST** to bather free water
- 4.) Please remove filters before adding salt. Do not put filters back in for at least 24 hours
- 5.) Dissolve 1/3 of the recommended **SEA SALT BLEND** in a pail of warm water and add to spa water slowly
**** Remember to use a clean pail with no detergent residue. Turn pump(s) on to help mix**
- 6.) Repeat step 5 until recommended amount of salt is added.
**** Remember to use a clean pail with no detergent residue. Turn pump(s) on to help mix**
- 7.) If necessary lower the pH using **SALT WATER BALANCE**.
**** Add 1 cap at a time testing every 15 mins until levels achieved**

Daily or after each use

- 1.) Test and balance the water accordingly (testing before use is recommended)
- 2.) Add 25g/1500L of **REFRESH**. Wait 1 Hour before entering the spa

Weekly

- 1.) Test and balance water accordingly
- 2.) Add 1oz/1000L of **BEST DEFENCE**.
- 3.) Add 100g/1500 L of **REFRESH** or if chlorine levels are low 30g/1000L of **BOOST****
**** If using BOOST do not enter the spa until chlorine levels return to below 5ppm**

Recommended Salt Dosage

Timberwolf	2 kg
Eagle	2.5 kg
Totem	3 kg
Mustang	3.5 kg
McKinley	4 kg
AWP (All Weather Pool Series)	11.5kg

Please note that as per Health Canada ruling RVD2018-36, the Essential (ONZEN II) system and any of its corresponding parts are not to be used in conjunction with sodium bromide. The Essential system and all of its components are strictly for use with sodium chloride.
