# Silver Sentinel Filter Placement

1. Your new Arctic Spa comes equipped with 3 different types of filter media. A Silver Sentinel thread in filter (**img 3.1s**), a rescue bag (**img 3.2s**) and a short pleated thread in filter (**img 3.3s**) **\*\* NOTE - Timberwolf will only come with Silver Sentinel thread in filter (img 3.1s)**

(img 3.4s)

2. To install the filters, locate the filter weirs in your spa. Standing outside of the spa with the weir(s) directly in front of you, remove the weir by simply lifting it out of the spa. On the left side insert the Silver Sentinel thread in filter by pushing down and turning until the filter does not float. Once in place, return the filter weir back into the canister. Repeat this process on the right side using the short pleated thread in filter, keeping the weir out to install the rescue bag.

3. With the filter weir still not in place, invert to expose the open end (**img 3.5**). Looking inside the weir, you will notice a grate. Remove the grate (**img 3.6**) by turning counter-clockwise. In place of the grate, thread in the rescue bag. Return the weir into the spa overtop of the short pleated thread in filter.
