Tips, Tricks and How to's

2011 - 2019 Arctic

Home Connect
Getting your hot tub online

Your Arctic Spa features OnSPA®. In order access all of the features and benefits you need to connect your hot tub to your home network. There are currently 3 methods of connectivity

GOOD - WIFI range extender. Provides your Spa with wifi capability that can extend and connect to your homes wireless network

BETTER - Ethernet Over Power Module. The internet signal is carried across the power lines in your house and in most cases does not require any additional running of wires or cables. One module connects inside the hot tub and the other into a wall outlet with a cable running into your router.

BEST - CAT5 network cable. Connecting your spa directly to your home router through a directly connected wired cable.

To gain access to onSpa® remotely you will need to create an on-line account by visiting www.myarcticspa.com .

onSpa® Features:

- Set temperature, filtration cycles, ozone production (if peak 2 installed)
- Turn on/off all pumps, lights etc
- Access Power Management and set time of day usage
- Access SpaBoy® (if installed as an option)
- Allows dealer to access functions of spa (if web connected)
- Plus more...
